

liberty of making experiments, trying new remedies, and to be able to arrive, without fear or reproach, to a great extent of knowledge of this kind, from which, by analogy, inferences might be drawn useful to the art of curing mankind.

---

SUPPLEMENT.

---

AFRICA, it has already been observed, appears to be the original climate of the horse, and from the country being so dry and warm, admits many customs that cannot be practised in the northern regions, at least with any effect. In different countries they not only receive different food, but are also differently managed. In Arabia and Barbary they scarcely ever are allowed herbage or grain, but are principally kept upon dates and camel's milk, which is given them morning and evening; they are seldom made use of till the seventh year,
