

on a brown ground, that are disposed along and across the animal's body, as if it were covered with a harness. It is a gregarious animal, and they are found in numerous herds in the plains of Podor.

---

#### THE GRIM.

---

THIS animal is only known to naturalists by the name of *Grimm*, or the *Wild Goat of Grimmerius*; and which, as we were not acquainted with the name it bears in its own country, we shall adopt. We find a figure of this animal in the German Ephemerides, which has been copied in the Academical Collection. Dr. Herman Grimmerius was the first who mentioned this animal, and what he said of it has been copied by Ray, and afterwards by all the nomenclators. Although his description\* is incomplete,

\* This animal, on the back and neck, is of a dark ash colour, with a white belly, and is about a foot and a half in height; on the top of its head between the horns is a tuft of black hair, and between each eye and the nostrils, there is a cavity filled with a yellow humour, oily, and viscid, which has some resemblance to castor, and musk, and fills again upon the cavities being emptied. *Grimmius*.
