

the perfect skeleton was shown in a previous lecture (Tab. 51, page 309).

TAB. 117.—PEAR ENCRINITE OF BRADFORD.

(*Apiocrinites rotundus* of Miller.)

Fig. 1. A group of apiocrinites restored, and represented as alive in the water; some with the tentacula expanded, others closed. 2. Body of the Bradford encrinite. 3. A vertical section of the same.

43. PEAR ENCRINITE OF BRADFORD; *Apiocrinites rotundus*. — Another form of crinoidea is
