

## GLOSSARY.

- Calc sinter* ..... Deposition from thermal springs charged with carbonate of lime.
- Calcaire grossier* .... A tertiary limestone.
- Calcium* ..... Metallic base of lime.
- Campanulariæ* ..... Arborescent corals, with bell-shaped cells.
- Cancellated* ..... Cellular, as the porous structure of bone.
- Capsule* ..... (*Socket*;) the hollow or concavity of a bone which receives the head of another bone.
- Carbon* ..... The elementary substance of charcoal and the diamond.
- Carbonate of lime*... Lime and carbonic acid.
- Carboniferous* ..... Belonging to coal.
- Carneous* ..... Fleshy.
- Caryophyllia* ..... Branched stellular coral.
- Centrifugal* ..... A force directed from the centre to the circumference.
- Cephalopoda* ..... Animals having the instruments of motion placed around the head; as the cuttle-fish.
- Cervical* ..... Belonging to the neck.
- Cetacea* ..... Marine mammalia, as the whale, porpoise, &c.
- Chalcedony*..... A species of silix, named from Chalcedon, a city of Asia, near which it is found in great abundance.
- Chelonia* ..... Animals of the turtle tribe.
- Chert* ..... A silicious mineral allied to flint and chalcedony.
- Choanite* ..... A zoophyte of the chalk.
- Cilia* ..... Hair-like vibratory organs.
- Cirrus* ..... A fossil turbinated shell of the chalk.
- Clavated* ..... Club-shaped.
- Coleoptera* ..... Insects having wing-cases, as beetles
- Conchoidal*..... Shelly.
- Concretion* ..... A coalition of separate particles.
- Condyle* ..... An articulating surface of a joint.
- Conformable* ..... Applied to parallel strata lying upon each other.
- Conglomerate*..... Fragments cemented together.
- Coniferæ*..... Trees bearing cones, as the fir, pine, &c.
- Cordiform* ..... Heart-shaped.
- Cornbrash* ..... A coarse shelly limestone of the oolite.
- Corticiferous* ..... Belonging to the bark of a tree.
- Cotyledons* ..... Seed-lobes of plants.
- Crag* ..... A tertiary deposit; from a provincial term (used in Suffolk and Norfolk) to denote gravel.
- Crater* ..... The vent of a volcano.
- Crateriform* ..... Having the form of a crater.
- Crenulated* ..... Knotted, or toothed.
- Crinoidea* ..... Lily-shaped animals.
- Crucial* ..... In form of a cross.
- Crustacea* ..... Animals having an external crust or skeleton, as the crab, lobster, &c.
- Cryptogamia*..... Plants with concealed fructification, as mosses, ferns, &c.
- Crystalline*..... Presenting the structure of crystals.
- Crystals* ..... Symmetrical forms assumed by mineral substances.
- Cupreus* ..... Coppery.
- Cyathiform*..... Cup-shaped.
- Cycadea* ..... A genus of plants allied to the palms and ferns.
- Delta* ..... Alluvial deposits formed by rivers.
- Denudation* ..... Strata exposed by the action of water.
- Desiccation* ..... The act of drying.
