

## INDEX.

- Elie de Beaumont on mountains, ii. 773.  
 Elk, Irish, i. 120.  
 Ellis, discoveries of, ii. 513.  
 Emerald, ii. 764.  
 Emys, fresh-water turtle, ii. 483.  
 Encke's comet, i. 25.  
 Encrinites, ii. 577.  
 Encrinital marble, ii. 587.  
 Encrinus moniliformis, ii. 473.  
 Endogenites erosa, i. 373.  
 England, geology of the south-east of, i. 340.  
 Entrochi, ii. 578.  
 Eocene formations, i. 200, 209.  
 Epoch of terrestrial mammalia, i. 123.  
 ——— in geology, i. 7.  
 Equisetum columnare, ii. 651.  
 ——— Lyellii, i. 373.  
 Erosion of valleys, i. 266.  
 Eruptions of Vesuvius, ii. 714.  
 Eye of the trilobite, ii. 677.  
 Existing geological changes, i. 36.  
 Extinction of animals, i. 115.  
 Extirpation of animals, i. 117.
- F.
- Fairhead, strata of, ii. 752.  
 Fairholme, Mr. comparison by, i. 15.  
 Falconer, Dr. on the Himalaya fossils, i. 152.  
 Fall of a meteorite, i. 31.  
 Faringdon, strata of, ii. 442.  
 ——— zoophytes of, ii. 560.  
 Faults, nature of, i. 192.  
 ——— in the Dudley coal, ii. 619.  
 Fauna of the chalk, i. 306.  
 ——— secondary strata of, ii. 499.  
 Faujus St. Fond, work of, i. 298.  
 Faxoe, fossils of, ii. 564.  
 Feet, human, imprints of, i. 76.  
 ——— of birds, character of, i. 136.  
 ——— of turtles, imprints of, ii. 484.  
 ——— of chirotherium, imprints of, ii. 478.  
 ——— impression of birds', ii. 479.  
 Felspar, ii. 709.  
 Ferns, fossil, ii. 651.  
 ——— in fructification, i. 327.  
 Filicites scolopendroides, ii. 685.  
 Final causes, ii. 787.  
 Pingal's cave, ii. 746.  
 Fishes, fossil, Agassiz, character of, i. 328, 424.  
 ——— of Aix, i. 246.  
 Fishes, fossil, of the coal, ii. 681.  
 ——— the chalk, i. 327.  
 ——— Monte Bolca, i. 251.  
 ——— the old red system, ii. 682.  
 ——— the south-east of England, i. 425.  
 ——— the wealden, i. 381.  
 ——— sauroid, i. 331.  
 Fitton, Dr. on the author's discoveries, i. 345.  
 ——— geology of Hastings, i. 348.  
 ——— Shanklin sands, i. 354.  
 ——— on the Maestricht beds, i. 297.  
 ——— Stonefield slate, ii. 444.  
 Flints of the chalk, i. 327.  
 ——— altered by basalt, ii. 735.  
 ——— infusoria of, i. 324.  
 Flora of the ancient world, ii. 685.  
 ——— carboniferous, ii. 663.  
 Fluata of lime, ii. 610.  
 Flustra, ii. 533.  
 ——— foliacea, ii. 526.  
 ——— microscopic view of, ii. 520.  
 ——— pilosa, polype of, ii. 522.  
 Flying reptiles, ii. 492.  
 ——— of Tilgate Forest, i. 403.  
 Forest marble, ii. 437.  
 ——— petrified, of Portland, i. 361.  
 ——— subterranean, i. 51.  
 ——— submerged, modern, i. 367.  
 Forfarshire, recent limestone of, i. 70.  
 Formation of strata, i. 42.  
 ——— modern coal, ii. 666.  
 Forster's Höhle, i. 168.  
 Fossil shells, i. 200.  
 Fossilization, ii. 640.  
 Fossils of the chalk, i. 303.  
 ——— galt, i. 305.  
 ——— Cambrian system, ii. 703.  
 ——— Silurian system, ii. 703.  
 Fox, fossil, of Ceningen, i. 251.  
 Fournet, M., on altered rocks, ii. 760, 768.  
 Fresh-water limestone of Auvergne, i. 261.  
 ——— tertiary shells, i. 232.  
 Fruit, fossil, of the tertiary, i. 217.  
 Fuci, fossil, ii. 472.  
 Fucoides Targionii, i. 306.  
 Fungia, ii. 545.  
 ——— fossil, of Maestricht, i. 307.
