

but the laws indispensable to this result are greatly outnumbered by the dispositions which are indispensable to it—such as the rightly sized and shaped lenses of the eye; and the rightly placed retina spread out behind them, and at the precise distance where the indispensable picture of external nature might be formed, and presented as it were for the information of the occupier within; and then, the variety and proper situation of the numerous muscles, each entrusted with an important function, and all of them contributing to the power and perfection of this curious and manifoldly complicated organ. It is not so much the endowment of matter with certain properties, as the arrangement of it into certain parts, that bespeaks here the hand of an artist; and this will be found true of the anatomical structure in all its departments. It is not the mere chemical property of the gastric juice that impresses the belief of contrivance; but the presence of the gastric juice, in the very situation whence it comes forth to act with advantage on the food, when received into the stomach, and there submitted to a digestive process for the nourishment of the animal economy. It is well to distinguish these two things. If we but say of matter that it is furnished with such powers as make it subservient to many useful results, we

property of matter, lest the cause of natural theology should be endangered by it—he might have recollected that the main evidence for a Divinity lies not in the laws of matter, but in their collocations—because of the utter inadequacy in the existing laws to have originated the existing collocations of the material world. So that if ever a time was, when these collocations were not—there is no virtue in the laws that can account for their commencement, or that supersedes the fiat of a God.
