INTRODUCTION.

THE GRADUAL PROGRESS OF KNOWLEDGE—EPOCH FORMED BY THE DISCOVERIES OF COLUMBUS—EARLY CONDITION OF GEOGRAPHICAL SCIENCE—IN EGYPT—IN THE BOOK OF GENESIS—GEOGRAPHY OF HOMER—THE SHIELD OF ACHILLES—COSMOGONY OF HERODOTUS—GEOGRAPHY AND THE GREEKS—OF ERATOSTHENES, PTOLEMEUS, AND STRABO—RECENT DEVELOPMENT OF THE SCIENCE,

13

BOOK I.

ON THE SITUATION OF THE TERRESTRIAL GLOBE IN SPACE.

CHAPTER I.

SITUATION OF THE TERRESTRIAL GLOBE IN THE UNIVERSE AND IN THE SOLAR SYSTEM—WHAT ARE PLANETS?—WHAT ARE STARS?—THE EARTH AND ITS MOVEMENTS OF ROTATION AND TRANSLATION—DISTANCE OF THE EARTH FROM THE SUN—THE OLD AND NEW VALUES—STANDARDS OF COMPARISON—RELATIONS OF THE PLANETS TO EARTH AND THE SUN—THEIR PERIODS OF REVOLUTION—PROCESS OF WEIGHING THE EARTH—MASS OR WEIGHT OF THE PLANETS—THE EARTH SPECIALLY ADAPTED FOR MAN—THE EARTH'S SATELLITE—ERRONEOUS CONCEPTIONS RELATING TO THE SOLAR SYSTEM—THE HYPOTHESES OF PYTHAGORAS AND ARISTARCHUS—SYSTEM OF PTOLEMEUS, OR THE EPICYCLES—SYSTEM OF COPERNICUS—HOSTILITY WITH WHICH IT WAS REGARDED—SYSTEM OF TYCHO BRAHE—KEPLER AND HIS DISCOVERIES—THE EXPERIMENTS OF GALILEO GALILEI—HIS THEORY, AND RECANTATION OF IT,

25

CHAPTER II.

THE TERRESTRIAL SEASONS: HOW THEY ARE PRODUCED—HOW CONNECTED WITH THE DIFFERENT POSITIONS OF THE EARTH—THE SOLSTICES—HEAT OF THE GLOBE IN RELATION TO THE SUN'S DISTANCE—THE ARCTIC AND ANTARCTIC CIRCLES—THE TROPICS—THE TEMPERATE, FRIGID, AND TORRID ZONES—DATES OF THE SUCCESSION OF THE SEASONS—THE ZODIAC—THE POINTS OF THE COMPASS,
