

CHAPTER IX.

DESERTS OF AFRICA AND ASIA—THE SAHARA, OR GREAT AFRICAN DESERT—ITS MEAN ELEVATION—CHARACTERISTICS OF ITS SOIL—THE SAHARA THE BED OF AN ANCIENT SEA—ITS SHIFTING SANDS—RESEMBLANCE OF THE DESERT TO THE OCEAN—THE SHIP OF THE DESERT—THE SAHARAN CARAVANS—ATMOSPHERIC PHENOMENA—THE MIRAGE, OR BAHR-EL-GAZAL—THE KHAM SIN—THE SIMOUN, AND ITS TERRIBLE CHARACTER—SUBTERRANEAN WATERCOURSES—THE ARAB WELL-SINKERS—ARTESIAN WELLS IN THE SAHARA—THE OASES—OASIS OF ASBEN—VALUE AND IMPORTANCE OF THE PALM TREE—THE CAMEL AND ITS USEFULNESS—THE DESERT OF GOBI—A BARRIER AGAINST CIVILIZATION,

234

BOOK IV.

THE TEMPERATURE OF THE GLOBE.

CHAPTER I.

TEMPERATURE OF THE TERRESTRIAL GLOBE—HOW IT IS INFLUENCED BY THE SOLAR HEAT—CONSIDERATIONS ON THE DIFFERENCES OF CLIMATE—WHAT IS UNDERSTOOD BY MEAN TEMPERATURE—HOW IT IS AFFECTED BY NATURAL CAUSES—ISOTHERMAL LINES, OR LINES OF EQUAL HEAT—THE TWO POLES OF EXTREME COLD—ISOTHERMAL AND ISOCHORIMAL LINES—A FEW FACTS RESPECTING EXTREMES OF HEAT AND COLD,

261

CHAPTER II.

THE LIMIT OF PERPETUAL SNOW—THE SIX CLIMATIC REGIONS OF THE GREAT MOUNTAINS—THE REGION WHERE THE SNOW NEVER MELTS—TABLE SHOWING ITS LOWEST BOUNDARY ON THE PRINCIPAL MOUNTAIN-RANGES OF THE WORLD—WHAT CAUSES AFFECT THIS BOUNDARY—EXTREME LIMITS OF ORGANIC LIFE—PREVALENCE OF THE RED COLOURING MATTER OF THE LICHEN "PROTOCOCCUS NIVALIS"—"RED SNOW" EXPLAINED—PHENOMENA OF AVALANCHES—DIVIDED INTO FIVE KINDS—SNOW AVALANCHES—CREEPING AVALANCHES—EARTH AVALANCHES—SUMMER AVALANCHES—DRIFT AVALANCHES—DISASTERS PRODUCED BY THEIR DESCENT,

269

CHAPTER III.

THE GLACIERS—WHAT THEY ARE—THEIR PART IN THE ECONOMY OF NATURE—CAUSE OF THEIR FORMATION—THEIR PROGRESSIVE MOTION—HOW AND WHEN ASCERTAINED—SCIENTIFIC RESEARCHES OF AGASSIZ—HIS SOJOURN ON THE GLACIER OF THE UNTERAAR—INVESTIGATION OF THE PHENOMENA OF GLACIERS—THE MODE IN WHICH THEY ARE FORMED—WHAT IS THE NEVE?—TWO CLASSES OF GLACIERS—THEIR SURFACE AND VOLUME—THEIR STRATIFICATION—CREVASSES—AN AIGUILLE, OR NEEDLE OF ICE—CATASTROPHES OCCASIONED BY THE GLACIERS—MOVEMENT OF TRANSLATION OF THE ICE-RIVERS—CALCULATIONS AS TO ITS RATE—THE MORAINES: FRONTAL, MEDIAL, AND TERMINAL—STRIATED PEBBLES, MEMORIALS OF THE PASSAGE OF A GLACIER—ROCHES MOUTONNEES—MELTING OF THE GLACIERS—ICE-CAVERNS EXCAVATED AT THEIR BASE—THE GLACIER DES BOIS—MERIDIAN HOLES—GLACIER TABLES—THE MARJELEN SEA—THE GOUILLE DE VASSU—DESCRIPTION OF THE HOSPICE OF ST. BERNARD,

280

CHAPTER IV.

THE LANDSCAPES OF THE ALPS—THE MER DE GLACE—THE GLACIER DE TALEFRE—THE GLACIER OF THE RHONE—THE GLACIER OF ROSENLAUI—THE HIMALAYAN GLACIERS—THE HUMBOLDT GLACIER—GLACIERS OF NORWAY—THE ARCTIC GLACIERS,
