

3 dip away from No. 1. No. 4 and C are generally nearly horizontal, except in the vicinity of mountain disturbances. Now, by keeping in mind the dips of the several strata, and tracing each, in conception, underneath those which cover it, the reader will be able to present to his imagination a sort of stereoscopic view of the underground structure of the Northern States.

I have now—leaving out of the account the debatable

Fig. 59. Hugh Miller, the Scotch Geologist.
