

tiny moraines, marking the last relics of the ice before it disappeared from the country.

The same kind of evidence of a period of greatest glaciation, followed by partial submersion, re-elevation, and the gradual retreat of the later glaciers, is plain in almost every valley in Cumberland, and Mr. Ward confirms this old view of mine, as applied to Wales, in his late account of 'The Glaciation of the Northern Part

Old glacier *cirques* in Arran, from Lagan Hills.

of the Lake District,' in the 29th volume of the Journal of the Geological Society.

In Scotland also the land underwent partial submersion and re-elevation during the Glacial epoch, and the gradual retreat of the later glaciers is witnessed in many a valley in the Carrick and Lammermuir Hills, in the moraines of the cirques of Arran, and through the mainland of the Highlands, and in Skye in the
