

## CIR

- Cirques, 429  
 Clark, Mr., on S. Wales coal-field, 597  
 Clay and mud, how formed, 10  
 Clay slate, 42  
 Clay and sands, of Bovey beds whence derived, 261  
 Cleavage and metamorphism, 42  
 Climate, changes of, 375-380  
 Close, Rev. M., Irish glaciers, 401  
 — on Sea-shells, Wicklow, 415  
 Clwyd, water of, 554  
 Clyde alluvia and remains, 546  
 — Beds, shells of, 413  
 — and Arran, raised beaches of, 549  
 Coalbrookdale, Carboniferous rocks of, 123  
 — Permian strata, 123  
 Coal-measures, South Wales and England, 120-126  
 Coal-measure basins, 128, 599-602  
 — — fossils, 131, 138  
 Coal-beds, how formed, 136-138  
 Coal-fields, original continuity of, 600  
 — exposed by denudation, 602  
 — concealed by newer strata, 603  
 — populations of and near, 603  
 Coal Commission, work of, 596-604  
 — available, 596-606  
 — duration of, 604-606  
 — manufactures, 607  
 Coal-pits, population employed in, 598  
 — of Oolitic Series Yorkshire, 195  
 — Brora, 198  
 Coniston Limestone, 74  
 — — and Upper Silurian, 331  
 Conisbro' Castle and Magnesian Limestone, 612  
 Consolidation of strata, 12  
 Continental epoch, Old Red to Triassic beds 156-158  
 Continent of Eocene epoch, 256-257  
 Contortion and metamorphism of strata, 45-46  
 Coquet river, 520  
 Coral reefs and depression of land, 12

## CWM

- Coral Rag, Calcareous Grit, and fossils, 183-186  
 — — Battle, 206  
 Coralline Crag phosphates and fossils, 270-271, 273-275  
 Cornstones, 104  
 Cornbrash, range of and fossils, 181  
 — and Inferior Oolite, community of fossils in, 182  
 Cors-goch, &c., radiation of glaciers from, 406  
 Coruisk, 451  
 Cotswold Hills, Inferior Oolite, 175  
 — — escarpment and view from, 316-317  
 Crag, 270-276  
 — physical features and faunas of, 357-358  
 Cray river, palæolithic implements, 541  
 Cretaceous series, 212-235, 311  
 — — Upper, England, physical geography of, 230-235  
 — — Lower, of Dr. Fitton, 201  
 Cretaceous escarpment, 331  
 — rocks, waters of, 554  
 Crevasses, 364  
 Croll, Dr. on glacial cycles, 375-80  
 Crustacea, in base of Old Red Sandstone, 104  
 Cumberland, volcanic rocks of, 80  
 — age of mountains of, 405  
 — buried in ice, 382  
 — formations, 324  
 — ice-stream from, 408-409  
 — submergence of, 428  
 — to East of England, structure and physiography, 331-333  
 — tributary glaciers of, 399  
 — valleys of, 529  
 — waters of, 553  
 Cumbraes, Bute, and Ailsa Craig, 382  
 Cumming, Rev. J. G., on glacial striations, Isle of Man, 399  
 Curves, anticlinal and synclinal, 33  
 Cwm-glas glacier, 421  
 Cwm-y-llan glacier, 422
