

PLATE XXIX.

	Page.
Fig. 1. OLENOIDES QUADRICEPS	187
1. Original figure of <i>Dikellocephalus quadriceps</i> Hall & Whitfield, enlarged to 3 diameters. Collection U. S. National Museum.	
1a. Side view of fig. 1.	
1b, 1c. Top and side views of associated pygidium. Collection U. S. National Museum.	
Fig. 2. OLENOIDES WAHSATCHENSIS	189
2. View of the type specimen of <i>Dikellocephalus Wahsatchensis</i> Hall & Whitfield. Collection U. S. National Museum.	
2a. View of type specimen of <i>Dikellocephalus? gothicus</i> Hall & Whitfield. Collection U. S. National Museum.	
Fig. 3. ORYCTOCEPHALUS PRIMUS	210
3. Head with the free cheeks in outline; the latter are raised up and appear broader than when attached to the central parts of the head. Collection U. S. National Museum.	
3a. Pygidium that is associated in the same piece of rock with the head wherever the latter is found, enlarged to 4 diameters. Collection U. S. National Museum.	
Fig. 4. PTYCHOPARIA QUADRANS	199
4. Central portions of the head with the free cheeks restored in outline. This figure varies from that given in vol. iv, Geol. Expl. Fortieth Par., pl. ii, fig. 11. It is drawn from a specimen marked as the type of the species.	
4a. Associated pygidium.	
4b. Associated free cheek.
