

- Quaternary, mammals, 154 *seq.* ; events in West, 269.
- Rain, where does it go ? 30.
- Ramsay on lake-basins, 279.
- Recession, of Niagara Falls, 291 ; Falls of St. Anthony, 292.
- Reigns of extinct types, 72.
- Relics of man, in river drift, 283 ; in lakes, 283 ; on shores, 283 ; in bogs, 283.
- Relief in mountain features, 54.
- Reptile monarchy, 246.
- Reptiles of Cretaceous time, 172 ; of Mesozoic, 246 *seq.* ; diversification of type of, 250 ; a comprehensive type, 260.
- Resolution of comprehensive types, 259.
- Retrospection in organic types, 258.
- Rhynchodus, 237.
- River drifts, 283.
- River terraces, 44.
- Rocking stones, 16.
- Rocks, kinds of, 35 ; how distinguished, 36.
- Rocky Mountains lowered, 53 ; forming, 267.
- Rotation of earth retarded, 118.
- Rotten limestone of Ala., 170.
- Salt**, geology of, 130 ; in sundry regions, 132 ; impurities of, 133.
- Sandstone, 40 ; red, of Connecticut valley, 249.
- Satellites, origin of, 218.
- Saurians, 248 *seq.*
- Schist, mica, 39 ; hornblende, 40.
- Seaboard Land, 233, 243, 264.
- Seaweeds, fossil, 187.
- Sedimentation, 45 ; in ocean, 226, 228 ; restricted to continental slopes, 228.
- Sediments, assortment of, 46 ; filling ponds, 47 ; in river waters, 48 ; thinner under deep waters, 229 ; transportation of, 50 ; on ocean bottom, 57, 58.
- Segregations of ore, 128.
- Séracs, 25.
- Shale, 40.
- Sharks, 236.
- Sherman, General, on "Old Faithful," 82.
- Shrinking of earth, 107. See "Contraction."
- Siberian mammoth, 156.
- Siderite, 129.
- Sierra Nevada uplifted, 268.
- Sigillaria, 174, 178, 241, 244, 245, 247.
- Silurian 72 ; rocks, 185 ; fossils, 187 *seq.*
- Sinter, silicious, 81.
- Skaptar Jokul, eruption of, 90.
- Smith, J. L., on gas wells, 145.
- Soluble substances in Drift, 84.
- Somma, on Vesuvius, 86, 91.
- South American quadrupeds, 160 ; continent, 265.
- Spinal axis in man, 303.
- Spirifera, 182.
- Springs and wells, 81, 82 ; in National Park, 81 *seq.*
- St. Anthony, Falls of, 292, 293.
- Stigmatia, 174.
- St. Peters Sandstone, 196.
- Storm, primeval, 222.
- Strains from shrinkage, 107, 242, 250.
- Strata, and classification, 62 ; examples of, 63, 64 ; formed by water, 64 ; not in deep sea, 65 ; oldest not yet seen, 75 ; arrangement of, 75, often in long folds, 78 ; situation of newest, 79.
- Stratified and unstratified, 39, 62.
- Streams, sources of, 32.
- Structure, geological explained, 75, 76, 77.
- Submergence of Quaternary, 275.
- Subterranean waters, 30.
- Succession of organic forms, 298.
- Sugar Loaf, Mackinac, 42.
- Sun, a remnant of fire-mist, 218.
- Sun's heat in the soil, 97.
- Sutro tunnel, 122.
- Swamps, origin of, 48.
- Swarms, meteoroidal, 213.
- Syenite, 39 ; formation of, 231.
- Symmetry, two kinds of, 193.
- Synclinal explained, 76.
- Systems of strata, 72, 73.
- Table Mountains** 95.
- Table of geological history, 73.
- Terminal moraines of continental glaciers, 273 *seq.*
- Terraces of lakes, 41 ; of rivers, 44, 278.
- Tertiary mammals, 167.
- Thickness of formations, 289.
- Tides in primitive history of earth, 219 *seq.*, 232 ; in reptilian age, 249.
