

OUTLINES OF THE LEFT EAR OF —

1. *Lemur macaco*; 2. *Macacus rhesus*, the Rhesus monkey; 3. *Cercopithecus*, a macaque; 4. human embryo of six months; 5. man, with Darwin's point well retained: the dotted outline is that of the ear of a baboon; 6. orang-utan (after G. Schwalbe):¹ * the original tip of the ear; 7. human ear with the principal muscles.

¹ G. Schwalbe, 'In wiefern ist die menschliche Ohrmuschel ein rudimentäres Organ?'—In what Respects is the Human Outer Ear a Rudimentary Organ? (*Archiv f. Anatomie und Physiologie*, 1889).
