

	PAGES
FOURTH PERIOD—NEWER DEVELOPMENT OF GEOLOGY AND PALÆONTOLOGY - - -	145-152

General survey, 145; The influence of the Universities, of Geological Societies, and of the Geological Survey Departments, 146.

CHAPTER I.

COSMICAL GEOLOGY - - - - -	153-171
----------------------------	---------

Cosmogony, 153; The Sun, 156; The fixed stars and planets, 157; The Moon, 161; Meteorites and falling stars, 163; Geogeny, 166.

CHAPTER II.

PHYSIOGRAPHICAL GEOLOGY - - - - -	172-185
-----------------------------------	---------

Form, size, and weight of the Earth, 174; The Earth's internal heat and the constitution of its interior, 175; Morphology of the Earth's surface, 181.

CHAPTER III.

DYNAMICAL GEOLOGY - - - - -	186-323
-----------------------------	---------

General survey, 186; Carl von Hoff, 187; Sir Charles Lyell, 189; (a) Geological action of the atmosphere, 197; (b) Geological action of water—Springs, 200; Chemical action of water, 202; Erosion, 203; Denudation, 214; Mechanical sediments, 215; Chemical deposits in water, 217; (c) Geological effects of ice, 220; Glaciers, 220; The Ice Age, 222; (d) Geological action of organisms, 239; Peat, 240; Coals, 240; Siliceous earth, 243; Algal and foraminiferal limestone, 243; Coral reefs, 245; Petroleum, 253; (e) Volcanoes, 254; (f) Earthquakes, 280; (g) Secular movements of upheaval and depression, 285; (h) Older dislocations in the earth's crust, 295; Tectonic structure and origin of the continents and mountain-chains, 306.
