

- Freiberg, Mining School of, 204, 206, 208, 237, 239.
- Füchsel, G. C., 197-201, 233, 336, 401.
- Fusion, Hall's experiments on, 319, 322.
- Generelli, expositor of Moro, 65, 126.
- Geognosy of Werner, 211.
- Geological changes in the past, views of the Ancients regarding, 33.
- Geological Maps, history of, 449.
- Geological nomenclature, unsystematic growth of, 407.
- Geological Record, imperfection of the, 439.
- Geological Sections, 185, 193, 196, 198.
- Geological Society of London, 297, 398, 413, 417, 423.
- Geological succession, doctrine of, 59, 192, 201, 232, 250, 333.
- Geological Survey of Great Britain, volcanic researches of, 270; work of, among Cambrian and Silurian formations, 426; foundation and objects of, 456.
- Geological time, Buffon on, 91; Lamarck on, 356; Darwin on, 439.
- Geologists, varied avocations of, 468.
- Geology, historical method in, 2, 59, 90, 162, 192; and speculation, 3, 6; and superstitions, 6; earliest pioneers of, 7; Palæontological, first beginnings of, 107, 117, 118, 119, 139; modern development of, 349, 355, 358, 364, 401; Physiographical, early observations in, 121, 160, 162; Volcanic, 127, 133, 140, 147, 162 [*see also* Volcanoes]; first use of term, 186; experimental research in, 190, 317; Stratigraphical, rise of in France, 333; in England, 378; remarkable advance of, 400, 438; rise and development of Glacial, 442; rise of Petrographical, 462; lies open to all observers, 469.
- Germany, basalts of, 147, 157, 160, 221, 242, 249; ancient volcanic rocks of, 271.
- Gesner, Conrad, 45.
- Giant's Causeway, 146, 147, 150.
- Giraud-Soulavie, 338-341, 401.
- Glacier action, Playfair on, 314, 442; in Britain, 446, 447.
- Gläser, G., 451.
- Glass, Hall's observations on slow cooling of, 319.
- Gneisses, Pre-Cambrian, 435.
- Granite, De Saussure on, 188; Werner on, 214, 230, 232; Von Buch on, 251; Hutton on, 290, 307; Lamarck on, 362.
- Greece, earliest geological ideas in, 7, 28, 33; subject to earthquakes, 13.
- Greenough, G. B., 336, 453, 456.
- Greywacke, 409, 410, 429.
- Griffith, R., 455.
- Guettard, J. É., early career of, 105; drawn to Geology through Botany, 106; neglect of work of, 108; early mineralogical surveys of, 110; on geology of Paris basin, 116; palæontological work of, 117, 118, 119, 140; on physiography, 121; on effects of rain and springs, 121; on work of the sea, 122; on rivers, 123; on the sea-bottom, 124; on limit of wave-erosion, 125;
