unless, perhaps, towards the north, where the two continents approximate; and where, in consequence, there are some species common to both. Thus the Elephant, the Rhinoceros, the Hippopotamus, the Giraffe, the Camel, the Dromedary, the Horse and the Ass; also the Lion and the Tiger, and various species of Apes, 13aboons, and other animals, with which we are familiar in the old world, were not found in America. On the other hand, the American species, the Lama, and the Peccari; and among carnivorous animals, the Jaguar, or American tiger; also the Agouti, the Paca, the Coati, the Sloth, and others, were equally unknown in the old world. Again, the animals of New Holland differ, like its vegetation, not only from all those of our continent, but from those of all the world besides. In New Holland, there are more than forty species of marsupial or pouched animals, of which the Kangaroo is that with which we have become best acquainted; while every where else, there is hardly a known instance of a pouched animal. Nor are these differences confined to the more perfect animals. They are even more striking as we descend in the zoological scale. Thus among birds; the individual species of the Parrot tribe, that are found in America, differ altogether from those of Africa; and those of Asia differ from both. The minute and beautiful family of Humming birds is pecu-
