

prove, that the Oriental bezoar does not come from the pasan alone, but from all the gazelles and goats which live in the mountains of Asia : 4. That the nanguers, whose horns are bent forwards, and of which there are two or three varieties, have been indicated by the ancients under the name of the *dama* : 5. That the antelopes, which are three or four in number, and differ from all others by the double flexion of their horns, were also known to the ancients by the names of *strepsiceros*, and *addax*. All these animals are to be found in Asia and Africa that is in the old continent, and to these five principal species, which contain twelve very distinct varieties, we shall not add two or three other kinds, of America, to which the indefinite name of *gazelle* has also been given, although they are different from all those we have already noticed ; as it would only increase the confusion, which is already too great. We shall give the history of these American animals, under their real names of Mezame, Temamaçame, &c. and shall here speak only of those animals of this species which are found in Africa and Asia : we shall also refer to the following articles, several other animals of Africa and Asia, which have been considered as antelopes or
goats,
