

CHAPTER V.

ON ROCKS DENOMINATED PRIMARY, AND THE CHANGES TO WHICH
THEY HAVE BEEN SUBJECTED.

The Origin of Rocks called Primary believed by many Geologists to be igneous....A Classification founded on this View....A Classification independent of Theory....Constituent Minerals of Granite....Varieties of Granite....Structure and Appearance of Granitic Mountains....Mont Blanc, and the Aiguilles in its Vicinity....Localities of Granite....Granite Veins....Passage of Granite into Porphyry and Sienite....Minerals found in Granite....On Granite as the Foundation Rock on which other Rocks are laid....The relative Antiquity of different Granitic Mountain Ranges....Granite pierced through by Porphyry and Currents of Lava....Granite sometimes protruded among the upper Strata, - - - 54

CHAPTER VI.

ON GNEISS AND MICA-SLATE, AND THE ROCKS WHICH ARE ASSO-
CIATED WITH THEM.

On the Passage of Granite into Gneiss.. Gneiss and Granit veiné....Mica-Slate....Formation of Gneiss and Mica-Slate....Talcous Slate, and Chlorite Slate....Crystalline Limestone denominated Primary, occurs both in Primary and Secondary Mountains....Formation of Limestone and Coral Islands by Animal Secretion....Dolomite, or Alpine Magnesian Limestone....Serpentine and Ollite, or Potstone....Euphotide or Saussurite the hardest and heaviest of rocks....Trap Rocks changed to Serpentine....Eurite or White Stone....Primary Porphyry a Mode of Granite....Recurrence of the same Rocks in Rock Formations of different Epochs, - - - - - 71

CHAPTER VII.

ON INTERMEDIATE OR TRANSITION ROCKS.

Characters and Classification of Transition Rocks....Slate or Clay-Slate....Peculiarities of Structure....Varieties of Slate....Flinty Slate....Greywacke and Greywacke-Slate; its Passage into Red Sandstone and Gritstone....Errors of Geologists respecting the old Red Sandstone....Lower Transition Limestone: remarkable Position of its Beds....Upper Transition or Mountain Limestone....Magnesian Limestone, in Mountain Limestone....Peculiarities in the Stratification of Clouds Hill....Errors respecting the Mountain Limestone of Derbyshire....Remarkable Structure of Crich Cliff....Quartz Rock....Jasper Greenstone....Coal Strata in England separate the Upper Transition Rocks from the Secondary....Observations on the Transition Rocks of distant Countries....Errors of Geologists respecting them, - - - - - 82

CHAPTER VIII.

ON THE LOWER OR GREAT COAL FORMATION.

The Geological Position and Structure of Coal Districts, called Coal-Fields. Dislocation and Disturbances of Coal Strata by Faults and Dykes....Mineral Coal, Anthracite, Plumbago, Wood-Coal or Lignite....Iron-Stone accompanying Coal Strata....On Carbon as an original Constituent Part of the Globe....On the Origin of Coal Strata, and their Deposition in Freshwater Lakes or Marshes....Numerous Repetitions of the same Series of Beds in the same Coal-Field....Precautions necessary in the Establishment of Iron Furnaces....On the Mode of searching for Coal....Hints to landed Proprietors on the Probability of finding Coal in Districts where it has not yet been discovered....On the Formation of Coal-Beds in Freshwater Lakes....On the Conversion of Vegetable Matter into Coal....Imperfect Coal Formations....Salt Springs in Coal Strata....Coal Mines in France and North America....Observations on the Consumption of Coal in England, and the Period when the Coal-Beds will be exhausted, - 101
