

## Family I. MADREPHYLLIÆA.

*Body cased with a solid calcareous cupped polypidom, lamel-  
lated internally.*

17. TURBINOLIA. Polypidom turbinate, becoming free by age.

18. CARYOPHYLLIA. Polypidom cylindrical, always attached.

## Family II. ACTINIIDÆ.

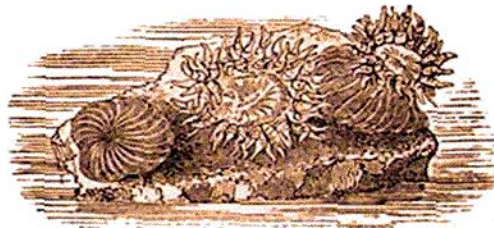

*Body naked, fleshy, contractile, locomotive.*

19. ACTINIA. Body conoid or cylindrical; the tentacula retractile.

20. ANTHEA. Body cylindrical; the tentacula non-retractile.

21. LUCERNARIA. Body somewhat campanulate; the tentacula  
in tufts disposed at distant intervals round the margin.

*Fig. 29.*

ACTINIA VIDUATA.
