

be continued, the whole soft parts sink within the calcareous cup."
5th April 1833.

POCILLOPORA INTERSTINCTA. *Madrepora interstincta*, *Mull.* Zool. Dan. prod. 252.—Dr Fleming (*Brit Anim.* 511) has seen a specimen "probably of this species," obtained by Dr Hibbert in Zetland, but I am not aware that any description of it has been yet published.

MADREPORA MUSICALIS, *Lin.* Syst. 1278. *Berk.* Syn. i. 211. *Turt.* Gmel. iv. 625. *Turt.* Brit. Faun. 204.—Said to be sometimes cast on the Irish coast; but without the slightest claim to denization.

MADREPORA PORPITA, *Turt.* Gmel. iv. 616.—A fossil confounded with the *M. porpita* of the Indian seas.

MILLEPORA TRUNCATA, *Stew.* Elem. ii. 426. Marked erroneously as British.

MILLEPORA LICHENOIDES, *Turt.* Brit. Faun. 204. *Turt.* Gmel. iv. 635.—I am not aware on what authority this has been introduced into our native Fauna by Dr Turton. Ellis says nothing that can lead one to suppose that his specimen was British.
