

- Galileo; observations upon his case, 217. Mr. Harcourt's allusion to it, 337.
- Genesis, the sacred book; comprises several distinct compositions, 172. Illustrations of its commencing portion, 227, 351.
- Geological Society, vindicated from misrepresentation, 355.
- Geologists, distinguished; instances of their fidelity to evidence, 107. Charges against them repelled, 148, 157, 163, 356.
- Geology; its nature as a study, and its objects, 13. Intention and value, 15, 21, 266, 275. Prerequisites for the study, 17. Objections against, 15. Apparent discrepancy with the Scriptures, 20, 70, 142, 295, 351. Wrongfulness and injurious effect of such an opinion, 19, 22, 158, 349. Vindicated against ignorant and assuming misrepresentation, 147, 159, 197, 272. Especial importance of this study to Christian ministers, 274. Recommendations with respect to it, 43, 299. Its moral tendency, 13, 14, 341, 348.
- Gifts, extraordinary; in the Apostolic Churches, 141.
- Gisborne, Rev. Thomas, Preb. Durham; his "Considerations on Modern Theories of Geology," 183.
- Gneissic rocks, 321.
- God; his necessary perfections, 32, 331. To be acknowledged in all scientific pursuits, 95, 283, 342. Our knowledge of the Deity rests upon analogy, 201. That analogy is in various forms, 203, 208.
- Granitic rocks, 49, 330.
- Grant, Rob. F. M. D. Prof.; on the plan of creation, 343.
- Greenough, George B. Esq.; his change of sentiment with regard to the Deluge, 124.
- Harcourt, Rev. William Vernon; his vindication of Geology, 239, 337.
- Hartley, Rev. John; on the moral state of Thiers, in the Puy de Dome, 306.
- Hawkins, Thomas, Esq.; on the Ichthyosauri and Plesiosauri, 334.
- Hebrew language; well understood, 167. Its conjunctive prefix, 231.
- Henslow, Rev. Prof.; on vegetable regions, 68. On the longevity of trees, 304, 305.
- Herschel, Sir John Wm. Fred.; on Lyell's "Principles of Geology," 196. On the necessity of Mathematics to Natural Philosophy, 263. On the working of the earth's internal heat, 324.
- Hitchcock, Edw. Esq. Prof.; on the ignorance and unfairness of distinguished opponents of Geology, 36. His judgment of Fairholme, Kirby, and Granville Penn, 36, 181. On deluges and drift, 116. On the grand law of the world, 338. On the relation of Geology to the Divine Government, 348.
- Hopkins, William, Esq.; his application of the highest mathematics to geological investigation 329.
- Hutton, James, M. D.; his merits in Geology, 54.
- , William, Esq. of Newcastle-upon-Tyne; joint author with Prof. Lindley of the "Fossil Flora," 310.
- Iceland; the seat of tremendous volcanic action, 279.
- Induction; cautious, at length successful, 57.
- Jameson, Robert, Esq. Prof.; on the non-existence of vestiges of the Deluge, 98.
- Java; volcanic eruptions of awful violence in that island, 280.
- Jennings, Rev. Dr. David; on the Mosaic description of the Creation, 155.
- Judea; its advantages as a country, 41.
- Knowledge, human; its imperfection, 262.
- Leibnitz; his scientific anticipations, 96.
- Light, before the Adamic Creation, 78.
- Lightfoot, Dr.; on 2 Pet. iii. 192.
- Lindley, Dr. and Prof.; his recommendation of botanical studies, and works to promote them, 265. His and Mr. W. Hutton's "Fossil Flora," 310. On the formation of Coal, 310. On the *Adansonia digitata* (Baobab,) 304.
