

- On the relative antiquity of organic remains, 311, 314.
- Lonsdale, William, Esq.; his discoveries of Entomostraca, 294. On the number and magnitude of the early fossils, 303.
- Luther; on the right and duty of independent inquiry, 141. His exposition of the Mosaic narrative of the Creation, 150. His sound judgment and moderation, 150.
- Lyell, Charles, Jun. Esq.; his works recommended, 43, 299. On the deposit of the Ganges, 64. Remarks on his "Principles of Geology," 195. On the proportions of fossil and recent shells, 335. On successions of species, 336.
- Macculloch, John, M. D.; his works recommended, 300, 327. On the early strata, 322. On the immensity of the geological periods, 327.
- Maclaren, Charles, Esq.; his Geology of Fifeshire and the Lothians, 74, 189. On the ancient beaches of Glen Roy, 330.
- Man; only one species, 68. Belongs to the most recent epoch of creation, 318, 343, 347.
- Mantell, Gideon, Esq. L. L. D.; his geological works recommended, 44.
- Microscopic fossil animalcula, 293.
- Mines; the deepest, 44.
- Miracles; not to be rashly assumed, 79, 81, 136. Their nature, 79. Their design, 80. Their propriety and importance, 81. Supported by argument from Geology, 347.
- Moses; his fidelity and divine mission, 170, 172, 258.
- Motion; constant, 41, 280. Regulated, 42.
- Mountains; the highest, 44.
- Murchison, Roderick Impey, Esq.; his works recommended, 44. His eulogium on Cuvier, 142. On the organic remains of the early fossiliferous systems, 303. On the moral impression from geological phenomena, 232, 331. On the succession of fossils, 315. His "Silurian System," 323.
- Neander, Aug. Prof. Berl.; on the errors of anthropomorphism, 214.
- Nebular hypothesis; Prof. Nichol upon, 229.
- Obligation, moral, 32, 276.
- Oolitic formations, 334, 339.
- Organic remains in the strata of the earth, 59—64, 290, 293, 303, 315, 323, 332—337, 339—343.
- Owen, Dr. John; on 2 Pet. iii. 192.
- Patrick, Bishop; on Genesis i. 154.
- Penn, Granville, Esq.; his theories, 179.
- Phillips, Prof.; his works recommended, 43, 52, 299. On the unbroken series of creations, 75—73. On the Coal-beds, 309. On the Gneiss, 322. On changes of species, 336.
- Philosophy; ignorant declamation against, 150.
- Phryganæ; their habits, 339.
- Poole, the commentator; on the Deluge, 254.
- Population, antediluvian; not great, 250. Its seat, 252.
- Powell, Rev. Prof.; his belief of a religious spirit in philosophers, 54. His hypothesis on the Mosaic earliest records, 165. His valuable contributions to Theology, 166. His remonstrance to objectors against the long periods established by Geology, 271. His protest against formal and traditional religion, 286. The author's obligation to him, 349, 351.
- Prichard, James Cowles, M. D.; on animal regions, 67. On the unity of the human species, 69. His inclination of opinion on the Deluge, 255.
- Prideaux, Bishop; on 2 Pet. iii. 192.
- Quadrumanous fossil remains, 319.
- Quarterly Review, on the volcanic region of Auvergne, 128.
- Red Sandstone, Old; see *Devonian*.
- Red Sandstone, New, 324, 333.
- Redemption; its importance and glory, 82.
- Redford, Rev. Dr.; on the antiquity of creation, 156.
- Regions of animal and vegetable nature; fossil, 63. Recent, 66, 84.
- Religion; its necessary connexion with Theology, 23. The dignity and happiness of man, 140, 260. Its pure nature, 273. Its attractions, 284.
