

LIGN. 88. SHELL-LIMESTONE; FROM THE MOUTH OF THE THAMES.

(Drawn by Mr. Joseph Dinkel.)

Fig. 1.—A mass of Cockle-shells and Whelks, consolidated into a coarse limestone.

2, 4.—One of the shells, *CARDIUM EDULE*, extracted from the block.

3.—A slice of the same, polished, the markings on the surface being derived from sections of the shells.
