

CHAPTER XXIII.

IGNEOUS CAUSES.

Changes of the inorganic world, *continued* — Igneous causes — Division of the subject — Distinct volcanic regions — Region of the Andes — System of volcanos extending from the Aleutian isles to the Molucca and Sunda islands — Polynesian archipelago — Volcanic region extending from Central Asia to the Azores — Tradition of deluges on the shores of the Bosphorus, Hellespont, and Grecian isles — Periodical alternation of earthquakes in Syria and Southern Italy — Western limits of the European region — Earthquakes rarer and more feeble as we recede from the centres of volcanic action — Extinct volcanos not to be included in lines of active vents - - - - - Page 330

CHAPTER XXIV.

VOLCANIC DISTRICT OF NAPLES.

History of the volcanic eruptions in the district round Naples — Early convulsions in the island of Ischia — Numerous cones thrown up there — Epomeo not an habitual volcano — Lake Avernus — The Solfatara — Renewal of the eruptions of Vesuvius, A.D. 79 — Pliny's description of the phenomena — Remarks on his silence respecting the destruction of Herculaneum and Pompeii — Subsequent history of Vesuvius — Lava discharged in Ischia in 1302 — Pause in the eruptions of Vesuvius — Monte Nuovo thrown up — Uniformity of the volcanic operations of Vesuvius and the Phlegrean Fields in ancient and modern times
345

CHAPTER XXV.

VOLCANIC DISTRICT OF NAPLES — *continued*.

Dimensions and structure of the cone of Vesuvius — Dikes — Lavas and minerals — Alluviums called "aqueous lavas" — Origin and composition of the matter enveloping Herculaneum and Pompeii — Condition and contents of the buried cities — Small number of skeletons — State of preservation of animal and vegetable substances — Rolls of papyrus — Stabiae — Torre del Greco — Concluding remarks on the Campanian volcanos - - - - - 359

CHAPTER XXVI.

ETNA.

External physiognomy of Etna — Lateral cones — Their successive obliteration — Early eruptions — Monti Rossi in 1669 — Towns overflowed by lava — Part of Catania overflowed — Mode of advance of a current of lava — Subterranean caverns — Marine strata at base of Etna — Val del Bove not an ancient crater — Its scenery — Form, composition, and origin of the dikes — Linear direction of cones formed in 1811 and 1819 — Lavas and breccias — Flood produced by the melting of snow by lava — Glacier covered by a lava stream — Val del Bove how formed — Structure and origin of the cone of Etna — Whether the inclined sheets of lava were originally horizontal — Antiquity of Etna — Whether signs of diluvial waves are observable on Etna - - - - - 380

CHAPTER XXVII.

VOLCANIC ERUPTIONS — *continued*.

Volcanic eruption in Iceland in 1783 — New island thrown up — Lava-currents of Skaptár Jokul, in same year — Their immense volume — Eruption of Jorullo in Mexico — Humboldt's theory of the convexity of the plain of Malpais — Eruption of Galongoon in Java — Submarine volcanos — Graham island, formed in 1831 — Volcanic archipelagos — Submarine eruptions in mid-Atlantic — The Canaries — Teneriffe — Cones thrown up in Lancerote, 1730–36 — Santorin and its contiguous isles — Barren island, in the Bay of Bengal — Mineral composition of volcanic products - - - - - 408

CHAPTER XXVIII.

EARTHQUAKES AND THEIR EFFECTS.

Earthquakes and their effects — Deficiency of ancient accounts — Ordinary atmospheric phenomena — Changes produced by earthquakes in modern times con-
