

drawn up, the head placed toward the east ; near the knees was a fine urn, with the usual zigzag British ornament. Near the right arm was an unique object—a piece of bone six inches long, squared at the ends, with four golden rivets, two at each end. In the vault were a bronze dagger, three large beads of amber, bone, and stone, the upper part of a hawk's beak, a piece of woollen stuff, or leather, and a buckle. *No trace of iron* in the tumulus. On every side of this vault were found skeletons buried with little symmetry or ceremony. Marks of much cremation ; some charcoal, half-burned human bones, and reddened soil. Flint spear-heads were found, and fragments of urns, some British, others Anglo-Saxon. The mound was probably used for burials long after the central hero was laid to rest.

In tumuli supposed to be British or Romano-British, opened by the Rev. E. W. Stillingfleet and his friends in 1815, 1816, and 1817, a much greater variety of objects was found than is usual in the Wold burials. The situation is near Arras and Hesleskeugh, about three miles from Weighton on the Beverley road. From the number of tumuli and earth-mounds, this may be regarded as a settlement of the Brigantes. Flat dotted ornaments and beads and bracelets of jet (or Kimmeridge coal), a miniature *bronze* celt only one inch long, with a pin and a small light blue glass bead, were among the more elegant objects discovered.

In a conspicuous barrow, called the 'Queen's barrow,' an iron knob was found placed over a kist. The kist contained a female skeleton, with the feet gathered up, the head toward the north. Near the head and upper part of the body, about one hundred glass beads were found ; some had a blue ground, spotted or zigzagged by white ; others were of a clear green, entwined by a serpentine white thread. A ring of red amber was found near the breast. A radiated brooch and a singular round ornament had been covered with a paste, and varnished. Two bracelets, a small ring, a pair of tweezers, and a pin with a ring at the end
