

## CHAPTER II.—THE LAWS OF CHANGES OCCASIONED BY HEAT.

	PAGE
<i>Sect.</i> 1. Expansion by Heat.—The Law of Dalton and Gay-Lussac for Gases .....	157
<i>Sect.</i> 2. Specific Heat.—Change of Consistence.....	159
<i>Sect.</i> 3. The Doctrine of Latent Heat.....	160

## ATMOLOGY.

## CHAPTER III.—THE RELATION OF VAPOR AND AIR.

<i>Sect.</i> 1. The Boylean Law of the Air's Elasticity.....	163
<i>Sect.</i> 2. Prelude to Dalton's Doctrine of Evaporation.....	165
<i>Sect.</i> 3. Dalton's Doctrine of Evaporation.....	170
<i>Sect.</i> 4. Determination of the Laws of the Elastic Force of Steam.....	172
<i>Sect.</i> 5. Consequences of the Doctrine of Evaporation.—Explanation of Rain, Dew, and Clouds.....	176

## CHAPTER IV.—PHYSICAL THEORIES OF HEAT.

Thermotical Theories.....	181
Atmological Theories.....	184
Conclusion.....	187

## THE MECHANICO-CHEMICAL SCIENCES.

## BOOK XI.

## HISTORY OF ELECTRICITY.

Introduction.....	191
CHAPTER I.—DISCOVERY OF LAWS OF ELECTRIC PHENOMENA	193
CHAPTER II.—THE PROGRESS OF ELECTRICAL THEORY.....	201
Question of One or Two Fluids.....	210
Question of the Material Reality of the Electric Fluid.....	212
