

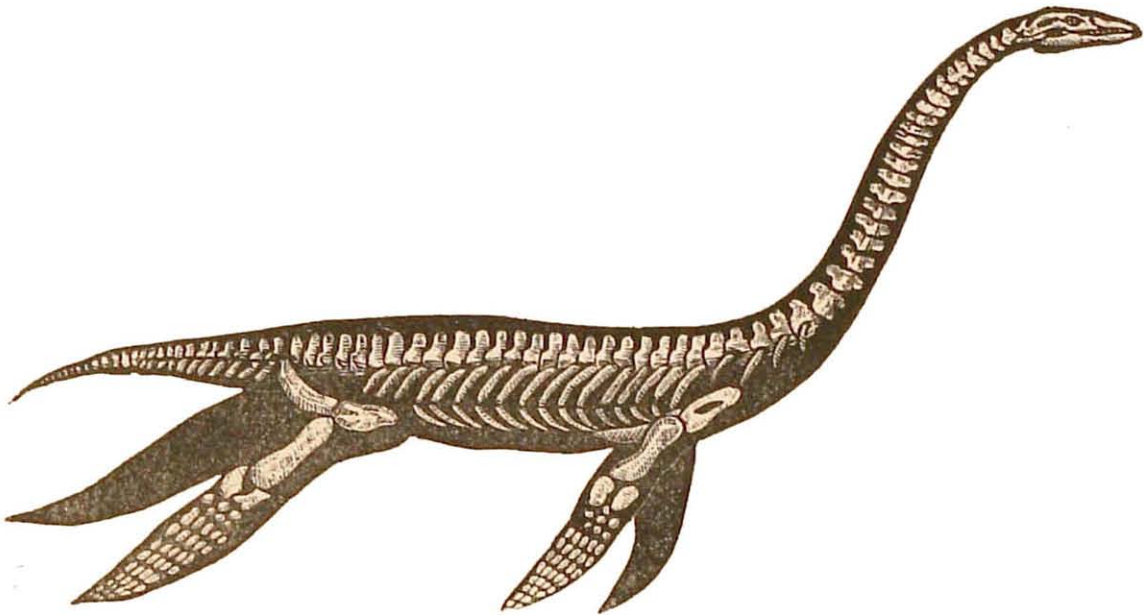

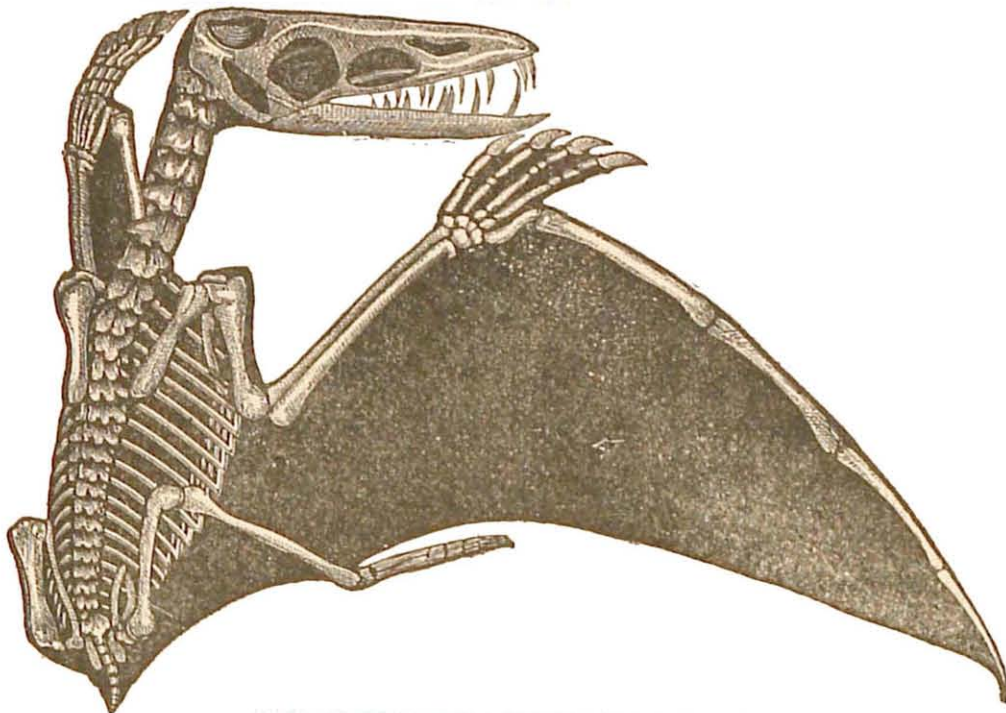

Fig. 63.

PLESIOSAURUS DOLICHODEIRUS.
(*Lias.*)

Fig. 64.

PTERODACTYLUS ORASSIROSTRIS.
(*Oolite.*)

recently-discovered pterodactyle of the Greensand, a spread of not less than twenty-seven feet. The *Lammer-geyer* of the Alps has an extent of wing of but from ten to eleven feet; while that of the great condor of the Andes, the largest of flying birds, does not exceed twelve feet.
